

Invitation

VI ICLGG

VI International Conference on Legume Genetics and Genomics

Marriott Hyderabad Hotel and Convention Center, Hyderabad, India

October 2-7, 2012

WELCOME

Legumes play important role in the quality of life on human kind and form a major crop for human food, animal feed and forage. Legumes have been part of agricultural production in several continents for thousands of years. Most legumes possess seeds rich in protein, oils and starches. They have the potential to play an increasing role in alleviating these threats owing to their ability to produce, with minimal environmental damage and external energy input in the form of nitrogenous and phosphorous fertilizers.

The VI ICLGG is an continuous effort of its mission to bring together scientists working on research aspects of legume biology in model species, using genetic and genomic tools, with those working on applied aspects and breeding of crop and pasture species. The meeting will focus on fundamental discoveries that extent our understanding of the unique traits of legumes and review the tools and resources and approaches including technological advances to study legume genome(s).

You and your colleagues and collaborators are invited to contribute to the scientifically rich meeting and explore the historical city and the beautiful country in a pleasant weather !!

Looking forward to welcoming you in VI ICLGG in Hyderabad!

CONFERENCE TOPICS

- ◇ Next generation genomics
- ◇ Nutrition
- ◇ Development
- ◇ Evolution and Diversity
- ◇ Symbiosis
- ◇ Abiotic Stress
- ◇ Pathogenesis and disease resistance
- ◇ Translational genomics
- ◇ Genomics assisted breeding
- ◇ Harnessing germplasm resources

PRE-CONFERENCE WORKSHOPS

Following workshops are also being organized on October 2, 2012

- ◇ The Small Regulatory World: RNAs and Peptides
- ◇ Tropical Legumes
- ◇ FabaTropiMed
- ◇ Peanut Genome Project

FEATURED SPEAKERS

David Bertoli, Catholic University, Brazil
Doug Cook, University of California-Davis, USA
Martin Crespi, ISV-CNRS, France
Jeff Doyle, Cornell University, USA
Peter Gresshoff, Queensland University, Australia
Valerie Geffroy, IBP, INRA, France
CLL Gowda, ICRISAT, India
Georgina Hernandez, UNAM, Mexico
T J Higgins, CSIRO, Australia
Sachiko Isobe, Kaduza DNA Research Institute, Japan
Scott Jackson, University of Georgia, USA
Günter Kahl, Frankfurt University, Germany
Attila Kereszt, Hungarian Academy of Sciences, Hungary
Suk-Ha Lee, Seoul National University, Korea
Da Luo, Sun Yat-sen University, China
Greg May, National Centre for Genome Resources, USA
Henry Nguyen, Missouri University, USA
N Nadarajan, Indian Institute of Pulse Research, India
Giles Oldroyd, John Innes Centre, UK
Jean-Marcel Ribaut, Generation Challenge Program, Mexico
Jens Stougaard, Aarhus University, Denmark
Karam Singh, CSIRO Plant Industry, Australia
Richard Thompson, INRA-Dijon, France
AM Torress, IFAPA, Spain
Michael Udvardi, Noble Foundation, USA
Carroll Vance, University of Minnesota, USA
Bert Vandenberg, University of Saskatchewan, Canada
...and many more planned!

In addition to plenary presentations and poster sessions, more than 50% talks in the conference will be selected from the abstracts selected. Please submit your abstract online to present your work in the exciting legume meeting. You may have an opportunity to present your work as an oral presentation!
